

Our Hypochlorite WFI Sterile Solutions are made with United States Pharmacopeia (USP) quality Water For Injection and Sodium Hypochlorite. It is designed for easy application onto cleanroom surfaces. Sterile filtered and filled in an ISO Class 5 aseptic environment, each package is double bagged for easy entry into your controlled environments. These products have an extensive documentation package to meet your validation objectives and are supported by the STERIS Technical Services team for individualized application and validation assistance.

## Hypochlorite WFI Sterile Solutions

### Oxidizing Cleaner

#### Features

High quality sodium hypochlorite solution

WFI produced from a Finn-Aqua™ Multiple Effect Water Still

Double bagged

0.2 micron filtered, filled in ISO Class 5 (Grade A or Grade B at rest) environment and each lot is USP <71> sterility tested

Manufactured under a FDA cGMP, ISO 9001 and ISO 13485 compliant quality system

#### Benefits

Well-established oxidizing chemistry

Highest quality Water For Injection for your facility

Allows easy entry into controlled environments

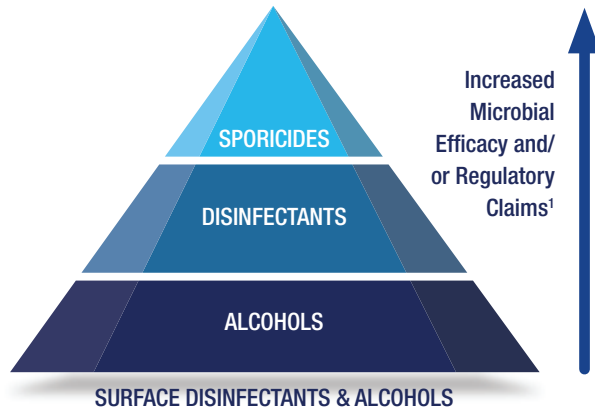

Facilitates introduction into your critical areas

Supports quality assurance and quality control

#### Applications

Ready-To-Use on common cleanroom surfaces:

- Product contact Surfaces
- Floors
- Walls
- Ceilings
- Countertops
- BSL Hoods
- Carts and Other Equipment
- Gloves
- Products may be applied by:
  - » Mopping
  - » Wiping
  - » Spraying

<sup>1</sup>Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

An important aspect to any microbial control program is including rinsing or cleaning steps to control organic residues. Residues can lead to future contamination on the floor or other hard surfaces. Oxidizing cleaners can be extremely effective with tough soils. The oxidation of soils and organic residues can break them down into easier to remove compounds. When removing residues, it is also important to use products that will not be a source of contamination. Our Hypochlorite Solutions are ideal for use in Life Science applications since they are prepared aseptically, with WFI. Our Technical Service team can help customize your contamination control program to take advantage of this excellent product.

### 5.25% Hypochlorite WFI Sterile Solution Ordering Information (Worldwide)

Description	Part Number
650 mL, 22 fluid ounces trigger sprays 12 per case	1S0677WR
946 mL, 32 fluid ounces trigger sprays 12 per case	1S0696WR
3.78 L, 1 gallon bottle 4 per case	1S0608WR
